LAUNDRY WASH SYMBOLS

WASH

Machine Wash Symbols	Normal wash	No Iron	Sensitive-Delicate wash		Hand wash		Not washable	No Spin
Water Temperatures – Maximum		95°C	70°C	60°C	50°C	40°C	30°C	
Water Temperatures – Symbol(s)		●●●	●●●	●●	●●●	●●	●	

DRYING

Drying Symbols	Suitable for dryer		No Iron		Sensitive / Delicate dry		Do not dry with dryer	Do not dry		Do not dry-clean
Drying Settings	At any temperature	At high temperature	At medium temperature	At low temperature	Without heating		Hang to dry	Lay to dry	Hang wet to dry	Lay in shadow to dry	Dry-cleanable

IRON

Iron -					Do not iron	Iron without steam
Dry or Steam		Iron at high temperature	Iron at medium temperature	Iron at low temperature		
Maximum temperature		200 °C	150 °C	110 °C		

BLEACH

All bleaches are allowed		Bleach (sodium hypochlorite) can be used	Bleach is not allowed	Only bleaches without chlorine are allowed

Tips for energy saving

Energy efficiency will be improved by using lower temperature programmes and appropriate detergents.

- Operate the product in the highest capacity allowed by the programme you have selected, but do not overload; see, "Programme and consumption table". See, "Programme and consumption table"
- Always follow the instructions on the detergent packaging.
- Wash slightly soiled laundry at low temperatures.
- Use faster programmes for small quantities of lightly soiled laundry.
- Do not use prewash and high temperatures for laundry that is not heavily soiled or stained.
- If you plan to dry your laundry in a dryer, select the highest spin speed recommended during washing process.
- Do not use more detergent than the recommended on the detergent packaging.

Correct load capacity

The maximum load capacity depends on the type of laundry, the degree of soiling and the desired washing programme.

The product automatically adjusts the water amount according to the weight of the laundry put inside it.

Laundry type	Weight (g)	Laundry type	Weight (g)
Bathrobe	1200	Hand towel	100
Fabric napkin	100	Women's night gown	200
Bed sheet	700	Underclothing	100
Bed sheet	500	Men's overalls	600
Pillowcase	200	Men's shirt	200
Tablecloth	250	Men's pyjamas	500
Towel	200	Blouses	100

INFORMATION

- *Never leave the detergent drawer open while the washing programme is running!*
- *When using a programme without prewash, do not put any detergent into the prewash compartment (compartment nr. "I").*
- *Do not select a programme with prewash if you are using a detergent bag or dispensing ball. Place the detergent bag or the dispensing ball directly among the laundry in the machine. Remove these if drying*
- *When machine is in Drying step, do not add any washing chemicals (Liquid detergent, Softener, etc.).*

Main Wash Compartment

Before starting the washing Programme, put powder detergent into the left compartment with number "II". Powder bleach/stain remover must also be put into this compartment.

Put the liquid detergent into the main wash compartment with number "II " before starting the washing Programme. Liquid stain remover must be put into this compartment.

Put the suggested amount of liquid detergent into the left compartment with "II " symbol and dilute it to the maximum filling level line (max. II) with warm water.

Particularly the concentrated detergents must be diluted with warm water; otherwise, the siphon may get clogged in time.

Do not fill the detergent above the maximum filling level line; otherwise the excess amount of detergent will reach the laundry without water and may cause stains on the garments.In this case you will need to refill the compartment. Do not pour the detergent onto the laundry directly since this may cause stains on the garments.

Liquid Softener Compartment

Put the suggested amount of liquid softener into the right compartment with " " symbol and dilute it to the maximum filling level line (max) with warm water.

Particularly the concentrated softeners must be diluted with warm water; otherwise, the siphon may get clogged in time.

Do not fill the softener above the maximum filling level line; otherwise the excess amount of softener will get mixed with the washing water and you will need to refill the compartment. Do not pour the softener onto the laundry directly since this may cause stains on the garments.

Liquid softener will be dispensed automatically at the final rinsing step of the washing Programme.

Preparation

Pre-Wash Compartment

Put the powder pre-wash detergent or powder stain remover into the middle compartment with number "I".

You can also put liquid bleach into this compartment while the machine takes in water during pre-wash or first rinsing step. Adding the liquid bleach while the machine takes in water allows it to be diluted before it is poured onto the laundry.

You must select extra rinsing option if you use liquid bleach in a washing Programme. Bleach must be removed from the laundry with rinsing; otherwise it may cause itching on the skin.

INFORMATION

- *Read the dosage instructions and label of your garments carefully before using the liquid bleach.*

CAUTION

- **Use only detergents manufactured specifically for washing machines.**
- **Do not use Powdered Soap.**

Adjusting the amount of detergent

The amount of washing detergent to be used depends on the amount of laundry, the degree of soiling and water hardness.

- Do not use amounts exceeding the dosage quantities recommended on the detergent package to avoid problems of excessive foam, poor rinsing, financial savings and finally, environmental protection.
- Use lesser detergent for small amounts or lightly soiled clothes.

Using gel and tablet detergent

- If the gel detergent thickness is fluidal and your machine does not contain a special liquid detergent cup, put the gel detergent into the main wash detergent compartment during first water intake. If your machine contains a liquid detergent container, fill the detergent into this container before starting the programme.

Display symbols

a- Washing indicator
b - Rinsing indicator
c - Spinning indicator
d- Drying indicator
e- End indicator
f- No Water indicator
g - Duration Information display
h- Loading Door Lock indicator
i- Child Lock indicator

Selecting the washing programme

1. Determine the programme suitable for the type, quantity and soiling level of the laundry in accordance with the "Programme and consumption table".

2. Select the desired programme with the **Programme Selection** knob.

INFORMATION

- *Programmes are limited with the highest spin speed appropriate for that particular type of fabric.*
- *When selecting a programme, always consider the type of fabric, colour, soiling level and permissible water temperature.*
- *Always select the lowest appropriate temperature. Higher temperature means higher electricity consumption.*

Washing programmes

Depending on the type of fabric, use the following main programmes.

INFORMATION

- *You can set you machine to switch to drying step at the end of washing cycle by pressing the Drying button after you have selected the washing programme for your laundry. Each time you press the button, info line shows at which step the drying process will take place and the relevant symbol will turn on. If you want, by continuing to press the button, you can perform drying for the maximum period of time allowed by the machine for drying.*
- *Symbols in the display are schematic and may not match the product exactly.*
- *When you will perform washing and drying by using the Drying function of your machine, load maximum 5 kg of laundry into the machine. If you load excessively, your laundry will not dry and machine will operate for a long time and consume more energy.*

• Cottons

Use for your cotton laundry (such as bed sheets, duvet and pillowcase sets, towels, bathrobes, underwear, etc.). Your laundry will be washed with vigorous washing action for a longer washing cycle.

INFORMATION

- *You can dry your laundry after the washing cycle without any interruption (automatic or timed drying can be performed after washing). For this, you must also select the Drying function before starting the washing programme.*
- *According to the drying selections which you will add to the washing programmes, you can see when the programme will end on the display of the machine.*
- *If you don't want drying to take place after the programme you have selected, press and hold the Drying auxiliary function button until the Drying light is turned off.*

• Synthetics

Use to wash your synthetic clothes (shirts, blouses, synthetic/cotton blends, etc.). Your laundry will be washed with a gentle action for a shorter washing cycle when compared to the Cottons programme.

For curtains and tulle, use the Synthetic 40˚C programme with prewash and anti-creasing functions selected. As their meshed texture causes excessive foaming, wash the veils/tulle by putting little amount of detergent into the main wash compartment. Do not put detergent in the prewash compartment.

INFORMATION

- *You can dry your laundry after the washing cycle without any interruption (automatic or timed drying can be performed after washing). For this, you must also select the Drying function before starting the washing programme.*
- *According to the drying selections which you will add to the washing programmes, you can see when the programme will end on the display of the machine.*
- *If you don't want drying to take place after the programme you have selected, press and hold the Drying auxiliary function button until the Drying light is turned off.*

• Woollens

Use to wash your woollen laundry. Select the appropriate temperature complying with the tag of your clothes. Use appropriate detergents for woollens.

INFORMATION

- *Drying function cannot be selected for the woollen wash programme.*

• Cottons Eco

Use to wash your normally soiled, durable cotton and linen laundry. Although it washes longer than all other programmes, it provides significant energy and water savings. Actual water temperature may be different from the stated washing temperature. When you load the machine with less laundry (e.g. ½ capacity or less), programme duration may automatically get shorter. In this case, energy and water consumption will decrease more, providing a more economic wash. This programme is available in the models with the remaining time indicator.

INFORMATION

- *You can dry your laundry after the washing cycle without any interruption (automatic or timed drying can be performed after washing). For this, you must also select the Drying function before starting the washing programme.*
- *According to the drying selections which you will add to the washing programmes, you can see when the programme will end on the display of the machine.*
- *If you don't want drying to take place after the programme you have selected, press and hold the Drying auxiliary function button until the Drying light is turned off.*

• Delicates

Use to wash your delicate laundry. Your laundry will be washed with more gentle washing action compared to the Synthetics programme.

• Hand Wash
Use to wash woollen/delicate laundry that bear "not machine-washable" care labels and for which hand wash is recommended. Your laundry will be washed with a very gentle washing action in order not to damage the clothes.

• Daily Quick
Use to wash your lightly soiled and unstained cotton laundry in a short time.

INFORMATION

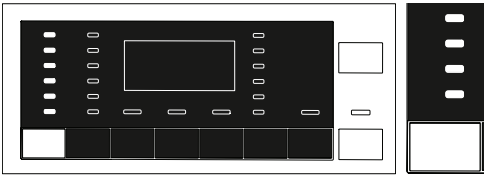
- *You can dry your laundry after the washing cycle without any interruption (automatic or timed drying can be performed after washing). For this, you must also select the Drying function before starting the washing programme.*
- *According to the drying selections which you will add to the washing programmes, you can see when the programme will end on the display of the machine.*
- *If you don't want drying to take place after the programme you have selected, press and hold the Drying auxiliary function button until the Drying light is turned off.*

• Super Short
Use it to wash a small amount of lightly soiled cotton laundry in a short time. This programme washes your laundry in 14 minutes.

INFORMATION

- *You can dry your laundry after the washing cycle without any interruption (automatic or timed drying can be performed after washing). For this, you must also select the Drying function before starting the washing programme.*
- *According to the drying selections which you will add to the washing programmes, you can see when the programme will end on the display of the machine.*
- *If you don't want drying to take place after the programme you have selected, press and hold the Drying auxiliary function button until the Drying light is turned off.*

Temperature selection



Whenever a new programme is selected, the recommended temperature for the programme appears on the temperature indicator. It is possible that the recommended temperature value is not the maximum temperature that can be selected for the current programme.

Press the **Temperature Adjustment** button to change the temperature.

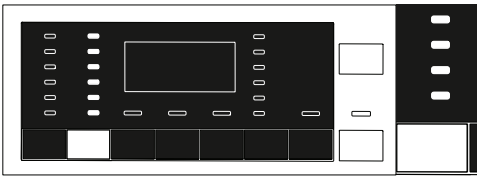
INFORMATION

- *Temperature Adjustment button works only backwards. For example, when you want to select 60 ^{0}C when the display shows 40 ^{0}C you need to press the button for several times until you reach 60 ^{0}C by going backwards from 40 ^{0}C.*
- *If you scroll to Cold Wash option and press Temperature Adjustment button again, the recommended maximum temperature for the selected programme is displayed. Press the Temperature Adjustment button again to decrease the temperature.*

Finally, Cold light indicating the cold wash option appears on the display.

You can also change the temperature after the washing has started. You can select the desired temperature after washing starts but you must do this before heating step starts.

Spin speed selection



Whenever a new programme is selected, the spin speed recommended for the selected programme is displayed on the **Spin Speed** indicator.

INFORMATION

- *It is possible that the recommended spin speed value is not the maximum spin speed that can be selected for the current programme.*

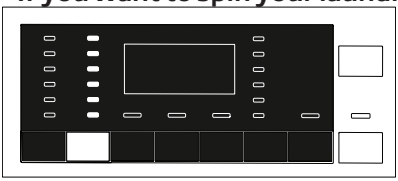
Press the **Spin Speed Adjustment** button to change the spin speed. Spin speed decreases gradually.

Then, depending on the model of the product, "Rinse Hold" and "No Spin" options appear on the display.

INFORMATION

- *Spin Speed Adjustment button works only backwards. For example, when you want to select 1000 rpm when the display shows 800 rpm, you need to press the button for several times until you reach 1000 rpm by going backwards from 800 rpm.*
- *Rinse Hold option is indicated with "" symbol and No Spin option is indicated with "" symbol.*

If you want to spin your laundry after the Rinse Hold function:



- Adjust the **Spin Speed**.

- Press **Start / Pause / Cancel** button. The programme resumes. Machine drains the water and spins the laundry.

If you want to drain the water at the end of the programme without spinning, use **No Spin** function.

INFORMATION

- *In programmes that do not allow spin speed adjustment, when Spin Speed adjustment button is pressed, spin speed light does not change and the buzzer is heard.*

You can also change the Spin Speed after the washing starts. You can select spin speed by pressing spin speed adjustment button after washing has started but before the spinning step.

Auxiliary function selection for drying

When a new programme is selected, press Auxiliary Function Selection button to adjust the drying option that is suitable for the selected washing programme.

INFORMATION

- *In programmes that do not allow drying adjustment, when Drying auxiliary function button is pressed drying light does not change and the buzzer is heard.*
- *Only for drying programmes, press Auxiliary Function Selection button to adjust the suitable drying option.*
